GROWER'S SECRET GRANULES 8-3-1

VEGETABLE PROTEIN BASED NPK FERTILIZER

Plant Nutrient for soil application in Agriculture and Horticulture

Grower's Secret Granules 8-3-1 (GSG831) is a vegetable protein based product.

GSG831 can be applied by ground to soil to promote plant growth and prevent or correct NPK deficiencies that could limit growth and yields. GSG831 is nontoxic to plants when applied as directed. For best results, apply GSG831 according to recommendations based on plant or soil analysis for a given crop.

Derived from plant protein hydrolysate

- Slow release nitrogen
- Can be applied pre-plant or in season
- Helps chelate other nutrients
- Supports abundant root formation and soil microbial activity

FREQUENTLY ASKED QUESTIONS:

- What is GSG831 made from? Soy protein hydrolysate, soft rock phosphate and seaweed.
- Is it Dusty? No, it is a virtually dustless granule under normal conditions.
- Can it be mixed with other products? Yes! However, we have not been able to test all combinations of possible mix partners.
- Are there any GMO products used in making GSG831? No
- What is the application rate for GSG831? Apply as needed according to your nutrient management program based on soil and tissue analysis.
- How much of a shelf-life does GSG831 have? At least 2 years for unopened bags. Re-seal after each use.
- What is the product availability? Available in 50 lb. bags and 1225 lb. super sacks.
- What is the cost of GSG831? Pricing available upon request.
