GROWER'S SECRET MICROBES

Microbes for soil application in Agriculture and Horticulture

CONTAINS NON-PLANT FOOD INGREDIENTS

<i>Azospirillum brasilense</i>	4x10 ⁷ CFU/mL
<i>Bacillus subtilis</i>	1x10 ⁷ CFU/mL
<i>Pseudomonas fluorescens</i>	1x10 ⁷ CFU/mL
<i>Trichoderma harzianum</i>	1x10 ⁵ CFU/mL
<i>Trichoderma virens</i>	1x10 ⁵ CFU/mL
<i>Trichoderma viride</i>	7x10 ⁵ CFU/mL
3% Humic Acids (derived from Leonardite)	

Density: 8.68 lbs/gallon (3.94 kg/3.785 liters) @ 68°

Expiration date: _____

STORAGE: Store in the original container in a cool, dry place away from excessive moisture and heat. Reseal container after each use.

CAUTION: May be harmful if swallowed. Avoid contact with eyes, skin, open cuts and sores. KEEP OUT OF REACH OF CHILDREN AND PETS. Wash hands after use. For general clean up use warm soapy water.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with label directions.

Grower's Secret Microbes contains a mix of beneficial microbes that may enhance micro nutrient availability to the plant. Suitable for all plants grown in the greenhouse, landscape, commercial agriculture, and garden. Can be applied to fruit, nut, and ornamental trees, shrubs, vines, small fruits, vegetables, broad acre and landscape plants.

GENERAL INFORMATION: Grower's Secret Microbes contains a consortium of beneficial microbes that exist in nature. They have been carefully selected and functionally characterized to produce synergistic results in agricultural production. Grower's Secret Microbes is a product that may enhance micronutrient uptake.

RECOMMENDED APPLICATIONS: Dilute with water in the ratio of 1:400 to 1:2000 before applying to soil using standard spraying equipment or existing irrigation system. Short season crops need only one application while other crops may need two or more applications. For best results, make sure soil pH is between 5.5 and 7.5 prior to application. Use of this product may allow reduction of fertilizer applications. For poor soils, apply more often until the soil has been revitalized.

Short season crops: Apply at the rate of 6 fl. oz. per acre following seeding/transplanting.

Full season crops: Apply at the rate of 6 fl. oz. per acre for each application. For best results, apply the first application right after planting or at leaf emergence, and the second application at the start of vegetative growth, typically 4 weeks after leaf emergence. A third (optional) application can be applied at the start of flowering. Additional applications may be applied throughout the growing season.

For smaller areas: Dilute 1 teaspoon into 2 gallons of water and use the solution to water the plants once a week instead of plain water.

☐ **2 gallons (7.57 L)** Net wt. 17.36 lbs. (7.87 kg) ☐ **200 gallons (757 L)** Net wt. 1736 lbs. (787.4 kg)
